

## CDS "TTC50.1" Proximity Sensor Assembly

### Start / Stop Adjustment Instructions

*NOTE: START/STOP TIMING IS PRE-SET AT FACTORY. ADJUST ONLY IF NECESSARY.*

- 1) Remove cover plate 1 from body 2 (slightly squeeze body while pulling on cover).
- 2) On disc 6 identify the correct mark for start / stop adjustment. (Each graduation mark equals 15 degrees.)
- 3) Remove screw 3, washer 4, and sleeve spacer 5.
- 4) Use two jack-screws (supplied) in holes A to gently pull and remove dial wheel disc assembly 7 from shaft.
- 5) Slightly loosen screws B while holding discs 6 and 8 together.
- 6) Move black metal strips 9 to the required locations identified in step 2 in order to phase cam with prox. sensor.
- 7) Reverse assembly procedure.

### Connector fastening
